品质管理
我们坚信，我们的业务因客户的业务扩张而扩张！
过去的 13 年中我们积累丰富的制造经验，并将其运用到品质控制，我们希望我们的产品为每一个用户带来美的体验并因此而感到愉悦！
但是经验告诉我们有一些瑕疵并不能快速识别

QM(Quality Management)
It is our conviction that our business expands with the expansion of our customers' business!
Over the past 13 years, we have accumulated a wealth of manufacturing experience, which has been applied to quality control. It is our sincere hope that our products can bring excellent experience and pleasant feelings to every user!
But experience tells us that it is inevitable that some flaws cannot be quickly identified,

尤其是当数量惊人的时候

especially when they are in staggering number.

宝仕坚持只做高品质的产品，为此我们选择更好的工艺，并对产品进行 2 次全检，第一次是它作为配件时候我们会逐个检查，一次是它成为成品包装发货前我们会逐个检查

BOSH insists on making high-quality products. To achieve this goal, we choose a better process and conduct a two-time full inspection of the product. We check the products one by one when they have not been assmbled and individually check the finished product again before shipping.
